Tao Zamorano

taozamorano@gmail.com | +44 7888 408175 | London, UK | https://tao.cl

Professional Summary

Full-stack developer with 9+ years building scalable web applications across UK and Chilean markets, now specialising in AI-integrated solutions. Currently advancing machine learning skills through intensive bootcamp while experimenting with automated coding agents. Proven ability to adapt quickly to emerging technologies and deliver across diverse technical environments ranging from IoT systems to modern React applications.

Experience

2024: React Developer at M10c, UK

Developed React applications for Coca-Cola's “Share a Coke” international campaign, supporting multi-language localization and global deployment through Vercel infrastructure.

Leveraged TypeScript's static typing to reduce runtime errors and streamline development workflows.

Followed best practice GitHub workflows and code review processes to enhance product robustness.

2020 - 2024: Developer at Archetype, UK

Developed and maintained WordPress websites for 10+ clients using Advanced Custom Fields, Bedrock, and Sage.

Delivered interactive media, infographics, and e-learning components using Vue.js and React for 3 global enterprise clients.

Built custom WordPress components including synchronized audio/text displays.

Integrated REST API services including weather report, financial indicators, and internal news feed into Laravel based large display dashboard.

Worked with international teams spanning 4+ time zones using Slack and Zoom.

Explored modern testing frameworks including Playwright for end-to-end testing.

2019 - 2020: Freelance Web Developer at Tao.cl, Chile

Built WordPress sites for small businesses, ranging from custom development to template-based solutions.

Created bespoke marketing websites and front-end interactivity using Vue.js, prioritizing simplicity and performance.

2018 - 2020: Web and IoT Developer at DataFlow, Chile

Architected and developed a corporate website from scratch, implementing optimized video header section with custom nightfall timelapse integration for maximum visual impact.

Developed monitoring dashboards for IBM DataPower security appliances using REST APIs, built mobile interface with Ionic framework, and created IoT proof-of-concept using NodeRED and MQTT protocols.

Upskilled a team of 3 developers on JavaScript web development while implementing Ionic mobile solutions.

2016 - 2018: Full Stack Developer at Bindex, Chile

Maintained PHP investment analysis application with automated data scraping for return predictions using CodeIgniter MVC framework while managing server infrastructure, handling database migrations and environment configuration.

Current Focus

Currently completing the Advanced Deep Learning program at ML Institute (ml.institute), focusing on practical applications including natural language processing with word2vec, CBOW, and skip-gram techniques.

Actively exploring AI-assisted development workflows using GitHub Copilot and automated coding agents (Cline and Cortex CLI).

Skills

Languages & Frameworks: JavaScript, PHP, React, Vue, Laravel, WordPress
Dev Tools: Git, Vite, Prettier, ESLint, Playwright.
Web Fundamentals: Accessibility, Core Web Vitals, Responsive design.
AI Integration: OpenAI Codex automated coding agent, GitHub Copilot, advancing ML implementation skills.
Philosophy: Advocate for simple, maintainable solutions that solve real problems efficiently.

Education

2013 - 2016: Analyst Programmer, INACAP, Chile
2007 - 2009: Visual Design Studies, UTEM, Chile

Last updated: June 2025
